Welcome to ATI WB Learning Portal

Administrative Training Institute (ATI) West Bengal has implemented Learning Management System (wbati.lms.gov.in) in collaboration with National eGovernance Division (NeGD), Government of India.

The Learning Portal will allow the Course Directors to design and track the progress of learning, Subject Matter Experts to monitor and Trainees to participate in a training course from a single online platform.

The course contents and materials can be uploaded to the Learning Management System, which makes it easily accessible for remote learners.

Anyone with a login and password can access the online training resources whenever and wherever.

LMS will also help in designing traditional classroom sessions as well as blended training courses.
